## EDUCATION

**Ph.D. Computer Science**, University of California San Diego

**M.S. Computer Science**, Washington University in St. Louis, **GPA: 4.0/4.0**

**B.S. Computer Science**, Washington University in St. Louis, **GPA: 3.95/4.0**

**B.S. Electrical Engineering**, Washington University in St. Louis, **GPA: 3.95/4.0**

**Expected June 2026**

**August 2020 – May 2021**

**August 2016 – May 2020**

**August 2016 – May 2020**

## RESEARCH EXPERIENCES

### **Graduate Research Student**

**September 2021 – Present**

Co-advised by Dr. Gal Mishne and Dr. Mikio Aoi, University of California San Diego

- Analyzing and processing a video dataset of freely-moving bipolar human participants for clinical assessment and analysis.
- Applying unsupervised quantification of undirected human behavior methods in PyTorch using machine learning approaches such as VAEs, clustering methods, latent representation learning, dimensionality reduction, and computer vision.
- Lead a team to design a novel transformer-based NLP model that outperforms baseline image captioning models and generated interpretable descriptions for subtle human behaviors.

### **Research Assistant**

**December 2019 – August 2021**

Advised by Dr. Carlos Ponce, Washington University School of Medicine, Harvard Medical School

- Developed human-subject and deep-learning based semantic segmentation pipelines in MATLAB and Python for the lab.
- Discovered principles of information encoding in primate ventral streams with macaque monkey electrophysiological data.
- Designed a quantitative approach to compare information encoding principles in primate brains and more than 20 learning-based neural networks models of the ventral stream such as convolutional neural networks, and vision transformers.
- Collaborated with lab members to design optimizers for in silico experiments that use latent space computing.

### **Research Assistant**

**May 2020 – August 2021**

Advised by Dr. Bhooma Aravamathan, Washington University School of Medicine

- Created an open field animal pose tracking framework to classify mouse behaviors such as rearing with 82.78% accuracy.
- Designed a clinically feasible video-based dystonia identification model using deep learning.

### **Research Undergraduate**

**August 2019 – May 2020**

Advised by Dr. Shantanu Chakrabartty, Washington University School of Engineering

- Assisted lab members in building machine learning models to visualize high-dimensional sonic data.
- Utilized neural networks to recognize and classify hand-drawn shape images with 98% accuracy.

## CONFERENCES PRESENTATIONS

**Zhang, Z.**, Yang, Y., Sheehan, T., Chou, C., Rosberg, H., Perry, W., Young, J., Minassian, A., Mishne, G., & Aoi, M. (2023). Semi-supervised quantification and interpretation of undirected human behavior. *Computational and Systems Neuroscience (COSYNE)*

**Zhang, Z.**, Rosberg, H., Perry, W., Young, J., Minassian, A., Mishne, G., & Aoi, M. (2022). Unsupervised quantification of undirected human behavior for bipolar disorder analysis. *IEEE Brain Discovery Neurotechnology Workshop (Spotlight)– Brain Mind Body Cognitive Engineering for Health and Wellness*

**Zhang, Z.**, Rosberg, H., Perry, W., Young, J., Minassian, A., Mishne, G., & Aoi, M. (2022). Unsupervised quantification of undirected human behavior for bipolar disorder analysis. *Society for Neuroscience Conference*

## HONORS AND FELLOWSHIPS

**Halcioğlu Data Science Institute PhD Fellowship**, *University of California San Diego*  
**Dean's Selected PhD Fellowship**, *Washington University in St. Louis*  
**Summa Cum Laude** (two degrees), *Washington University in St. Louis*  
**Dean's List** (all semesters), *Washington University in St. Louis*  
**Emerging Voices Writing Award**, *Washington University in St. Louis*  
**Tau Beta Pi Engineering Honor Society** (president), *Washington University in St. Louis*  
**Lambda Sigma Honor Society**, *Washington University in St. Louis*

**March 2021**  
**October 2019**  
**May 2020**  
**Sept 2016 – May 2020**  
**April 2017**  
**October 2018 – August 2021**  
**August 2017 – May 2018**

## **MENTORING EXPERIENCES**

**Mentor**, *Simons Collaboration on the Global Brain Undergraduate Research Fellowship Program* **September 1, 2022 - June 30, 2023**

- Direct teaching of academic competencies and norms, including academic values, history of the discipline, and conflict of interest.
- Offering the mentee a collaborative role in research by analyzing data, co-authoring articles and identifying supplemental projects.
- Providing advice for strategies for handling difficult work situations, finding resources, and suggestions for balancing work and life.
- Advocating for the mentee's success by protecting research time, providing exposure to opportunities, and recognizing talents.
- Offering encouragement by conveying positive regard, providing moral and emotional support, and giving positive feedback.

## **TEACHING EXPERIENCES**

**Teaching Assistant**, *Washington University McKelvey School of Engineering* **August 2018 – May 2021**

- Instructed around 30 students in machine learning, circuits, algorithms, and engineering math courses and received high ratings from course evaluations.
- Supported students via weekly office hours and grading lab reports and homework assignments.

**Engineering Tutor** - *Washington University McKelvey School of Engineering* **August 2018 – May 2020**

- Organized weekly lesson plans for students in physic course to assist with homework and received high reviews in Engineering Student Services.
- Mentored 5 students each semester and provided professional resources and research opportunities.

## **VOLUNTEERING EXPERIENCES**

**Grocery Delivery Driver** - *Fit and Food Connection; St. Louis Housing Authority; Kindness Groceries* **April 2020 – September 2021**

- Delivered groceries weekly from Fields Foods and Save-A-Lot program to 15-20 families in St. Louis affected by COVID-19.
- Prepared and delivered meals bi-weekly from Fit and Food Connection program to senior households affected by COVID-19.

**CSE DEI Community** – admission volunteer

**December 2022 – Present**

- Participated in the activities in the DEI community and volunteered to review admission materials.

## **SKILLS**

- **Language:** Fluent in English and Chinese.
- **Programming:** Python, MATLAB, PyTorch, Tensorflow, C/C++, Java, JavaScript
- **Machine Learning skills:** Deep Learning, Computer Vision, Unsupervised Learning, Statistical Inference, Signal and Image Processing, Optimization, Graph Model, Manifold Learning
